

## ARTA® Credit Bureau Access

This feature helps you request information from your credit bureau without adding unnecessary steps to the transaction or leaving your ARTA Lending or Rembrandt® Lending software.

It works in conjunction with the ARTA Application Module to complete the application, send the request, and receive the information without having to access separate software systems.

And, it helps increase speed and efficiency even more by eliminating the need to manually enter credit scores and report information.

### Business Results

- Increase Speed and Productivity—Flow information directly from the credit report into the loan application, eliminate the need to leave the program, and reduce the amount of time spent manually entering credit scores.
- Improve Effectiveness and Reduce Risk—Help eliminate data entry errors and reduce risk with up-to-date documents developed by one of the most trusted compliance providers in the industry.
- Address Business Objectives—Take advantage of a more efficient work flow.

### Highlights

- Combine data from several credit bureaus into one concise, easy-to-read document.
- Receive single, dual, or tri-merged credit scores and reports from credit agencies, such as Experian®, Equifax®, and TransUnion.
- Import credit score information directly into your ARTA Lending or Rembrandt Lending system.
- Take advantage of the collaboration between Bankers Systems and Kroll Factual Data Corp—one of only five direct providers approved by Freddie Mac to tri-merge credit reports for Loan Prospector®.

## Key Benefits

- Pull credit reports quickly with only six required fields of information.
- Automatically populate the Credit Application with liabilities and personal data from the credit bureau report.
- Use the credit bureaus you want, so you can continue relationships you've built and grown accustomed to.
