

I-32 XHTML Output Writer

The I-32 Writer provides mortgage lenders with the ability to output Wolters Kluwer Financial Services' VMP Mortgage Solutions documents in file formats that facilitate e-mortgage transactions. Compatible with the I-32 Document Engine and the RAKIS® Document Control and Production System, the I-32 Writers output UFX files in PDF, XHTML, and SMART Doc™ formats.

XHTML combines the best of HyperText Markup Language (HTML) and eXtensible Markup Language (XML) to provide an open standard in which extractable data is locked in a single file with the document presentation. The I-32 Writer for XHTML produces an exact replica of the UFX form image and data. Without any plug-ins, the generated XHTML formatted file uses Internet Explorer® (IE) 5.0 and higher versions for browser-based rendering.

Benefits

- Accurate UFF/UFX representation in XHTML
- Preferred “view” in SMART Docs and e-mortgage
- View forms in Microsoft® IE with no plug-ins
- Maintains page breaks
- Extracts bitmap images and includes them in the XHTML as jpg images
- Optional colored field output
- Produce files with multiple documents or form-based files that contain single documents
- Data elements in the XHTML file can be located through field IDs contained in SPAN tags
- XML compliant for post-processing data extraction
